JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Arrival at Reedy Island Quarantine of vessel from a Mexican port.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., February 10, 1901.

SIR: Through the medical officer in command of the national quarantine service on Delaware Bay and River, I have the honor to report the arrival on the 9th instant, of the British steamship *Broadgarth*, from Tampico, in ballast; no passengers; bill of health signed by United States Consul Magill.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from West Indian and South American ports.

BALTIMORE, MD., February 9, 1901.

SIR: I have to report the arrival during the week just ended of the following-named vessels from the ports named: February 7, American barkentine *White Wings*, from Rio de Janeiro, coffee. February 8, British steamship *Homeric*, from Santiago de Cuba, ore; Norwegian steamship *Hero*, from Daiquiri, ore.

Respectfully,

WM. F. STONE,
Collector of Customs.

Reports from the Mexican border.

February 9, 1901—*El Paso, Tex.*—*Inspection service.*—I have the honor to report the following summary of work at this station during the week ended February 9, 1901: Inspection Mexican Central Railroad passengers, 184; inspection Rio Grande and Pacific Railroad passengers, 36; inspection Mexican immigrants, 68; disinfection of clothing, bedding, etc., of immigrants, 47 pieces; disinfection soiled linen imported for laundry work, 347 pieces; disinfection of soiled Pullman linen, 2,572 pieces; vaccination of immigrant children, 12.

February 12, 1901.—I have to report that there are 3 cases of confluent smallpox in the pesthouse here. Smallpox prevails in many counties in Texas and in some New Mexico localities. Ninety-eight per cent of the inhabitants of El Paso, children and adults, are successfully vaccinated, and the prompt action of the different railroad corporations, smelting and mining companies to have all their employees vaccinated and revaccinated leaves but little material for the spread of the disease here.

E. ALEXANDER,
Acting Assistant Surgeon, U. S. M. H. S.
